Objective

Computer Science undergraduate with hands-on full-stack development experience (React, Node.js, FastAPI, PostgreSQL) and a production internship building SaaS features. Seeking Software Development / Full-Stack Engineering internships.

Education

JD College of Engineering & Management, Nagpur — Maharashtra
B.Tech, Computer Science & Engineering — CGPA: ***8.70*** — *Sept 2024 – June 2028*

Experience

4iBiz Techno-Solutions Pvt. Ltd. — Remote
Full Stack Developer Intern — *Jun 2026 – Aug 2026*

- Engineered full-stack features for a production gym-management SaaS platform across backend services and frontend modules
- Migrated the VZBAL HRMS mobile application from Flutter to React Native and integrated the staging API to achieve full feature parity
- Executed 100+ manual test cases across authentication, employee management, and settings modules; identified and documented 15+ bugs, including high-severity data-upload and third-party integration issues
- Collaborated with the engineering team using Git-based version control and Agile workflows

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, PHP, C
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Technologies: Node.js, Express.js, FastAPI, React.js, React Native, REST APIs, JWT Authentication, MVC Architecture
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Firebase, Redis
Developer Tools: Git/GitHub, GitHub Actions, Postman | **Cloud & Deployment**: Vercel, Render

Projects

Digital Document Service Portal | *PHP, PostgreSQL, JavaScript, MVC* | GitHub — 2025

- Architected an ERP-style document portal enabling role-based access control (RBAC), QR-code verification, and multi-level approval workflows; awarded 1st Prize
- Developed the PHP MVC backend and PostgreSQL data layer, including a real-time admin dashboard for request tracking and audit workflows

SAAR — AI Personal Assistant | *Python, FastAPI, OpenCV, Twilio* | GitHub — Jan 2026 – Present

- Engineered an AI personal assistant integrating speech-to-text, wake-word detection, and text-to-speech for hands-free system control
- Developed a modular FastAPI backend integrating the Twilio API and OpenCV for remote command execution and presence-based automation

Cyber Hunt — Online Treasure Hunt Platform | *Next.js, Supabase, Vercel* | Live — 2026

- Designed a live full-stack competition platform enabling secure authentication, dynamic question progression, and role-based admin controls
- Developed backend APIs and database integration supporting real-time scoring, deployed on Vercel for live technical competitions

Gig Flow — Smart Leads Dashboard | *React, TypeScript, Node.js, MongoDB* | GitHub | Live — 2026

- Designed a full-stack MERN dashboard enabling secure lead management through JWT authentication, RBAC, and REST APIs
- Implemented advanced filtering, pagination, CSV export, and reusable TypeScript components for a responsive dashboard UI

Achievements

- **1st Prize, College Mini Project Competition** (2025) — Digital Document Service Portal
- **Top 10 / 84+ teams, National Level Hackathon** (Mar 2026) — WideSoftech, Priyadarshini College of Engineering

Certifications

- **Oracle Agentic AI Certified Foundations Associate** — Oracle (Jul 2026)
- **Deloitte Cyber Security Job Simulation** — Deloitte Australia via Forage (Mar 2026)
- **Introduction to Internet of Things** — NPTEL, IIT Kharagpur (2026)
- **AI Fluency for Students** — Anthropic (2026)

Leadership & Positions of Responsibility

- **Content Writer, Schollogma CSE Forum** (Jan 2025 - May 2025) — Authored technical articles to drive student engagement
- **Internshala Student Partner (ISP)** — Promoted internship opportunities and student upskilling initiatives
